

 **mobile  
network  
services**

niu is a converged IT and telecoms solutions and services provider with an unparalleled heritage.

**niu**  
know how

Mobile technology is evolving at a pace. Smartphones and tablets are predicted to soon outnumber fixed line voice and data clients as the primary network access device.

Cost-effective and robust mobile infrastructures offer a viable alternative to Ethernet. With negligible lead times for device and user installation, feature-rich functionality, leaps in bandwidth capacity, security, and fixed mobile convergence. Enabling users to jump from cellular to Wi-Fi networks with ease, mobile services are increasingly affordable and accessible.

niu is constantly evaluating the business implications of this fast changing world, reviewing new technologies and determining the value and opportunity for organisations. Our long-standing relationships with leading mobile partners, combined with a deep understanding of the entire IT infrastructure, enable us to provide impartial, best practice advice and services for your mobile strategy.

niu, and its long standing partners, offer a range of mobile network services to help you identify and implement the best value package, quickly and without fuss. We know that it takes more than just technology to meet your requirements; it's as much about how it is deployed, implemented and managed.

From reviewing tariffs, integrating business applications or opening network access for corporate, personal and guest mobile devices, we can deliver the technology, processes and management to support your mobile strategy.

Our portfolio of hosted solutions, fully managed or as-a-service, means we can deliver the technology, integration and management of mobile network services to best suit your needs.

## niu's Mobile Network Services help organisations to address the following challenges:

### mobile device

Identifying the device, operating system and features to match your business requirements is essential to pervasive user adoption and achieving a return on investment. niu's range of services and service features include;

- Impartial consultancy based on business and user requirements, and marketplace
- Consideration and impact of data, voice and IT application integration
- Procurement and implementation of mobile, smartphone and tablet estate
- User profiling and policy implementation

### mobile carriers & billing

Quality and breadth of coverage, trusted partner relationships and finding the best-fit tariff plan are essential to operational effectiveness and efficiency. niu's range of services and service features include;

- Deep knowledge of coverage, service quality and billing from all the leading UK carriers
- Managed mobile connectivity and helpdesk
- Single point of contact for fault resolution and billing

### mobile applications

The seamless and secure integration of mission critical applications such as email, IM, CRM or ERP, onto mobile devices enable employees to work more productively and ensure business continuity. niu's range of services and service features include;

- Consultancy on application data requirements and network optimisation
- Integration and mobilisation of core business applications
- Implementation of security controls, such as token authentication and encryption, for applications and corporate data

### mobile data roaming

Data roaming costs can quickly spiral out of control, especially for organisations where employees are required to travel internationally. Identifying and applying the best tariff options and mobile broadband services to employee needs will help to drive down expenditure. niu's range of services and service features include;

- Evaluation and profiling of business and user requirements
- Dynamic monitoring and procurement of best-fit tariffs and data services

niu has the knowledge, expertise and heritage of implementing cost-effective and feature-rich mobile services for blue chip organisations.

# why choose niu?

Your business deserves the best innovations and at niu we're truly focused on understanding and meeting your needs. From providing carrier neutral expertise on the best handset, tariff or overall solution to mobile application deployment and security, niu has the know how to advise you on the best-fit mobile strategy to underpin your business.

# niu service portfolio

## application services

Maximise uptime and security at a known cost. From basic messaging services to full ERP solutions, niu expertly hosts and manages application platforms.

## desktop services

Enhance productivity and reduce energy costs. Access a comprehensive range of focused IT and telecoms support services, from PC break/fix to fully managed desktop solutions.

## compliance & security services

Protect your business and ensure it meets stringent industry security and compliance requirements. niu offers the assurance of many recognised industry security accreditations, such as ISO27001 and the government Communications-Electronics Security Group (CESG) Listed Advisor Scheme (CLAS).

## server & storage services

Optimise infrastructure to raise performance and reduce management costs – quickly and effectively. Whatever the level of your requirement, niu has the expertise and experience to deliver the right solution.

## voice & video network services

Harness the best services available, reduce costs and simplify management. We can provide a range of onsite telephony or video conferencing solutions, or deploy our hosted IP telephony services to augment your communication needs with a broad range of commercial and operational benefits.

## data network services

Gain independent advice on the best network for your business. niu works with all the major carriers, offering you superb bespoke solutions and trusted management options.

## mobile network services

Identify and install the best value package, quickly and without fuss. niu delivers independent expertise on the best handset, provider, tariff or overall solution for your business.

## data centre services

Tackle complex requirements quickly with the aid of highly experienced, specialist support. niu advises on, designs, implements and manages computer room and data centre environments for a complete and secure data service.

## niu know how

niu provides IT and telecoms know how. When we say know how, we mean inside-out, top to bottom know how. We dissect your problems so we can piece together bespoke solutions. In a marketplace littered with IT and telecoms providers, we know that few if any, companies can offer the breadth and depth of expertise that is inherent within niu. **At niu we really do know how.**
