

server & storage services

niu is a converged IT and telecoms solutions and services provider with an unparalleled heritage.

know how

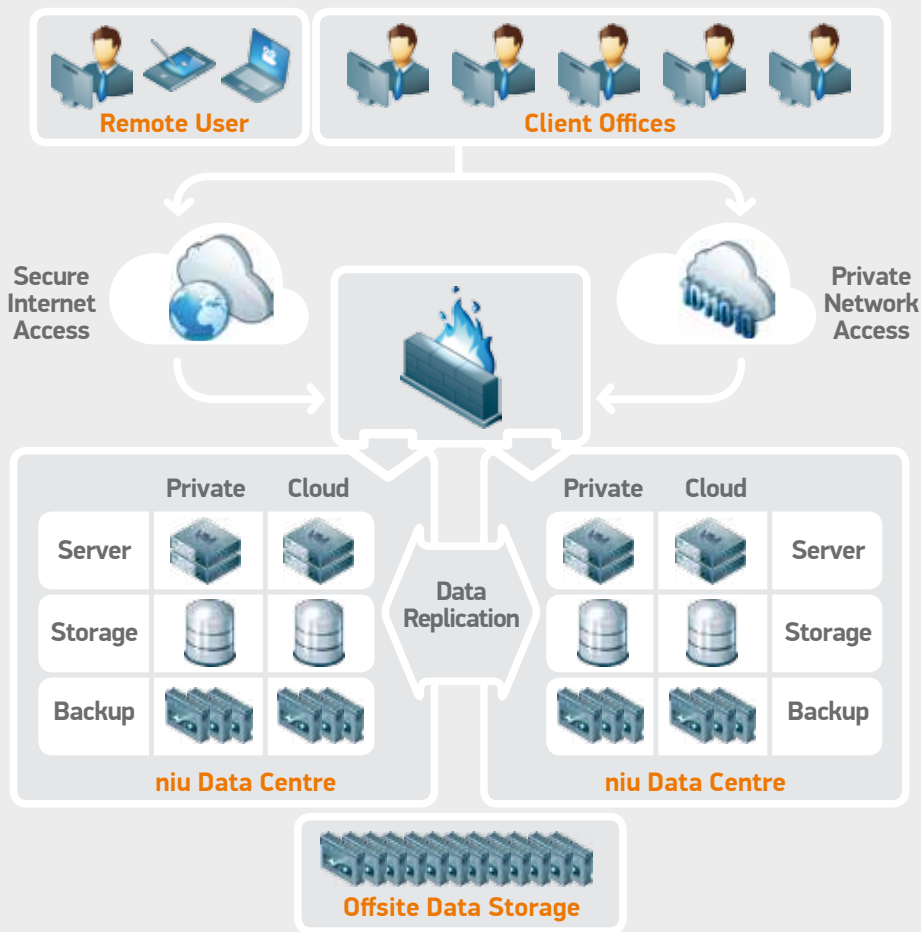

Servers and storage are the backbone of most businesses. Balancing an increasing appetite for collaborative, intuitive applications and flow of information demands ever higher performance and processing power: technologies such as virtualisation and cloud computing are filling the void.

Maintaining an agile, efficient and highly utilised core ICT infrastructure is pivotal to retaining a competitive edge. The rapid evolution of server and storage solutions, however, can make this challenging: keeping pace with the latest hardware or software releases needs to be justified through the demonstration of a strong return-on-investment.

With an unparalleled heritage in the management of core ICT infrastructures for blue chip organisations, niu can advise you of the right server and storage solutions to enhance your business performance. In niu you gain a technology partner that enables you to benefit from new technologies, design concepts and cost efficiencies, helping to de-risk your ICT investment.

With three state-of-the-art data centres, niu has a significant investment in highly virtualised shared and dedicated infrastructure platforms and services. Through niu you can provision server and storage services on demand, based on high performance best-of-breed technologies, via a flexible delivery and commercial model that fits your business requirements.

You need the most efficient infrastructure possible, and you need it now. niu brings all its expertise, experience and resources to tackle this challenge.

We can manage your onsite infrastructure or provide Server & Storage Services via our Tier III ISO27001 accredited data centres for a secure and resilient end-to-end managed hosting service.

Understanding your needs begins with our requirements capture process. System availability and resilience, backup, and disaster recovery are all considered as we address the challenges facing your business.

Holding top tier partner accreditations with major infrastructure vendors, such as IBM and VMWare, niu is superbly placed to deliver the cost and performance benefits of a virtualised or more traditional solution.

niu offers a range of services to help businesses achieve a high performance, agile ICT infrastructure. We know it takes more than just technology to meet your requirements; it's as much about how it is designed, deployed and monitored.

Whether it's advising you on hosted cloud services to storage and archiving requirements, we can provide you with impartial advice, knowledge, and guidance on best practice.

Our portfolio of hosted, onsite, fully managed, or as-a-service solutions, means we can deliver the technology, processes and management to support your business infrastructure.

niu's Server & Storage Services include:

private server

Your business critical servers, managed by niu, and located onsite at your premises, or within niu's secure and resilient hosted data centres. niu's range of services and service features include;

- Range of packaged and bespoke-built, fully managed private server solutions that deliver an integrated, optimised, fast, efficient and resilient business infrastructure
- Customer management portal providing access to a range of tools, performance and capacity statistics and reports
- Range of compliance & security services to address regulatory and security requirements
- Leading edge technology platforms and designs including Windows, Linux, AIX, i50S, HP/UX, VMWare, IBM Tivoli monitoring
- Choice of ownership options to reduce capital expenditure

cloud server

High performance server capacity, on demand, from niu's secure and resilient data centres. A cost effective and flexible method of provisioning of IT infrastructure to meet your business challenges. niu's range of services and service features include;

- Flexible, capacity-based solutions that deliver an integrated, optimised, secure, efficient and resilient business infrastructure as and when your business demands
- Provisioned across niu's VMWare shared server infrastructure offering operational and financial economies of scale
- Sliding scale of service SLAs
- Customer management portal providing access to a range of tools, performance and capacity statistics and reports
- Range of compliance & security services to address regulatory and security requirements
- Leading edge technology platforms including Windows, Linux, VMWare, IBM Tivoli monitoring

private storage & backup

Storage and back-up services, managed by niu, and located onsite at your premises, or within niu's secure and resilient data centres. niu's range of services and service features include;

- Range of packaged and bespoke-built, fully managed private storage and back-up services to address cost, growth, performance, resilience and retention objectives and requirements
- Tiered range of storage and backup services to store business information utilising dedicated infrastructure
- Services include the design, build and ongoing management of your storage solution

cloud storage & backup

Storage and back-up services, provisioned on demand, from niu's secure and resilient data centres. niu's range of services and service features include;

- Range of services from tape to virtualisation, delivering high-performance, secure and agile storage solutions
- Back-up, disaster recovery and data replication for private and cloud solutions
- Data retrieval solutions for online, near-line, onsite, offsite back-up, and fast data recovery

data replication

A broad range of services to ensure data is backed up, replicated and securely stored in multiple locations. niu's range of services and service features include;

- Onsite and hosted solutions available
- Supports Recovery Time Objective (RTO) and Recovery Point Objective (RPO) as part of disaster recovery strategy
- Provides application, database, server or storage level replication
- End-to-end ownership from design and implementation to ongoing management of your data replication services

niu has the knowledge, expertise and heritage of managing ICT infrastructure for blue chip organisations.

why choose niu?

Your business deserves the best innovations and at niu we're truly focused on understanding and meeting your needs. We can advise you of the right server and storage solutions to optimise your processes and performance. In niu you gain a technology partner that has significantly invested in shared and dedicated platforms, enabling you to benefit from new technologies and architectures to provisioning and cost efficiencies. From design and implementation through to ongoing management, niu has the skills and know how to provide you with a business infrastructure that is integrated, optimised, fast, efficient and scalable.

niu service portfolio

application services

Maximise uptime and security at a known cost. From basic messaging services to full ERP solutions, niu expertly hosts and manages application platforms.

desktop services

Enhance productivity and reduce energy costs. Access a comprehensive range of focused IT and telecoms support services, from PC break/fix to fully managed desktop solutions.

compliance & security services

Protect your business and ensure it meets stringent industry security and compliance requirements. niu offers the assurance of many recognised industry security accreditations, such as ISO27001 and the government Communications-Electronics Security Group (CESG) Listed Advisor Scheme (CLAS).

server & storage services

Optimise infrastructure to raise performance and reduce management costs – quickly and effectively. Whatever the level of your requirement, niu has the expertise and experience to deliver the right solution.

voice & video network services

Harness the best services available, reduce costs and simplify management. We can provide a range of onsite telephony or video conferencing solutions, or deploy our hosted IP telephony services to augment your communication needs with a broad range of commercial and operational benefits.

data network services

Gain independent advice on the best network for your business. niu works with all the major carriers, offering you superb bespoke solutions and trusted management options.

mobile network services

Identify and install the best value package, quickly and without fuss. niu delivers independent expertise on the best handset, provider, tariff or overall solution for your business.

data centre services

Tackle complex requirements quickly with the aid of highly experienced, specialist support. niu advises on, designs, implements and manages computer room and data centre environments for a complete and secure data service.

niu know how

niu provides IT and telecoms know how. When we say know how, we mean inside-out, top to bottom know how. We dissect your problems so we can piece together bespoke solutions. In a marketplace littered with IT and telecoms providers, we know that few if any, companies can offer the breadth and depth of expertise that is inherent within niu. **At niu we really do know how.**
